WELDING RESEARCH 1953

INDEX

AUTHORS

BRADSTREET, B. J.—Weldability of Twelve Low-Alloy Steels containing Vanadium 107r

BRADSTREET, B. J., COTTRELL, C. L. M., and PURCHAS, J. G.—Hard-Zone Crack Sensitivity and Strength of two Low-Alloy Steels 76r

CHADWICK, J. D., HULL, W. G., and HOULDCROFT, P. T.—Metal-Arc Welding of Thick Aluminium-5 per cent. Magnesium Plate .. 59r

COTTRELL, C. L. M., PURCHAS, J. G., and BRADSTREET, B. J.—Hard-Zone Crack Sensitivity and Strength of two Low-Alloy Steels 76r

DIXON, H. E., and ROBERTS, J. E.—Spot Welding of Low-Carbon Steels (24 s.w.g. and $\frac{1}{8}$ in. thick) 3r

DIXON, H. E., ROBERTS, J. E., and ROBERTS, T. M.—The Measurement of Spot Welding Machine Variables 16r

DIXON, H. E., and ROBERTS, J. E.—Impact Torsion Testing of Bolt Welds 96r

HOULDCROFT, P. T., CHADWICK, J. D., and HULL, W. G.—Metal-Arc Welding of Thick Aluminium-5 per cent. Magnesium Plate .. 59r

HULL, W. G., HOULDCROFT, P. T., and CHADWICK, J. D.—Metal-Arc Welding of Thick Aluminium-5 per cent. Magnesium Plate .. 59r

HULL, W. G., and NEEDHAM, J. C.—Self-Adjusting Arc and Controlled-Arc Welding Processes 80r

HULL, W. G., ORTON, L. H., and NEEDHAM, J. C.—The Self-Adjusting Arc—Improved Power Sources 100r

MOORE, D. C.—Gaseous additions to the Argon Shield in Welding Aluminium 68r

NEEDHAM, J. C., HULL, W. G., and ORTON, L. H.—The Self-Adjusting Arc—Improved Power Sources 100r

NEEDHAM, J. C., and HULL, W. G.—Self-Adjusting Arc and Controlled-Arc Welding Processes 80r

ORTON, L. H., NEEDHAM, J. C., and HULL, W. G.—The Self-Adjusting Arc—Improved Power Sources 100r

PUMPHREY, W. I.—Some Aluminium-Zinc-Magnesium Alloys—an examination of their tensile properties and oxy-acetylene Welding characteristics 26r

PUMPHREY, W. I.—Some Aluminium-Copper-Silicon Alloys 65r

PURCHAS, J. G., BRADSTREET, B. J., and COTTRELL, C. L. M.—Hard-Zone Crack Sensitivity and Strength of two Low-Alloy Steels .. 76r

ROBERTS, J. E.—Triple-Projection Welding of Deep-drawing quality Mild-steel Sheet .. 111r

ROBERTS, J. E., and DIXON, H. E.—Spot Welding of Low Carbon Steels (24 s.w.g. and $\frac{1}{8}$ in. thick) 3r

ROBERTS, J. E., ROBERTS, T. M., and DIXON, H. E.—The Measurement of Spot Welding Machine Variables 16r

ROBERTS, J. E., and DIXON, H. E.—Impact Torsion Testing of Bolt Welds 96r

ROBERTS, T. M., DIXON, H. E., and ROBERTS, J. E.—The Measurement of Spot Welding Machine Variables 16r

WELLS, A. A.—The Mechanics of Notch Brittle Fracture 34r

TITLES

Gaseous additions to the Argon Shield in Welding Aluminium, by D. C. Moore .. 68r

Hard-Zone Crack Sensitivity and Strength of two Low-Alloy Steels, by C. L. M. Cottrell, J. G. Purchas and B. J. Bradstreet 76r

Impact Torsion Testing of Bolt Welds, by H. E. Dixon and J. E. Roberts 96r

Measurement of Spot Welding Machine Variables, by H. E. Dixon, J. E. Roberts and T. M. Roberts 16r

Mechanics of Notch Brittle Fracture, by A. A. Wells 34r

Metal-Arc Welding of Thick Aluminium-5 per cent. Magnesium Plate, by W. G. Hull, P. T. Houldcroft and J. D. Chadwick 59r

Self-Adjusting Arc and Controlled-Arc Welding Processes, by W. G. Hull and J. C. Needham 80r

Self-Adjusting Arc—Improved Power Sources, by J. C. Needham, W. G. Hull and L. H. Orton 100r

Some Aluminium-Copper-Silicon Alloys, by W. I. Pumphrey 65r

Some Aluminium-Zinc-Magnesium Alloys—an examination of their tensile properties and oxy-acetylene Welding characteristics, by W. I. Pumphrey 26r

Spot Welding of Low-Carbon Steels (24 s.w.g. and $\frac{1}{8}$ in. thick), by H. E. Dixon and J. E. Roberts 3r

The Formative Years (B.W.R.A)—A Review of Progress from March, 1946, to April, 1953 117r

Triple-Projection Welding of Deep-drawing quality Mild-steel Sheet, by J. E. Roberts .. 111r

Vanadium-Bearing High Tensile Weldable Steels, by the Staff of B.S.A. Group Research Centre, Sheffield 103r

Weldability of Twelve Low-alloy Steels containing Vanadium, by B. J. Bradstreet 107r
